[REDACTED] EXAMINER

CUNNINGHAM, STEPHEN C

[REDACTED] ART UNIT

[REDACTED] PAPER NUMBER

3663

DATE MAILED: 06/17/2003

Please find below and/or attached an Office communication concerning this application or proceeding.

**BEST AVAILABLE**

<b>Advisory Action</b>	<b>Applicant No.</b>	<b>Applicant(s)</b>
	09/931,544	RAPP, LUTZ
	<b>Examiner</b>	<b>Art Unit</b>
	Stephen C. Cunningham	3663

--The MAILING DATE of this communication appears on the cover sheet with the correspondence address--

THE REPLY FILED 19 May 2003 FAILS TO PLACE THIS APPLICATION IN CONDITION FOR ALLOWANCE. Therefore, further action by the applicant is required to avoid abandonment of this application. A proper reply to a final rejection under 37 CFR 1.113 may only be either: (1) a timely filed amendment which places the application in condition for allowance; (2) a timely filed Notice of Appeal (with appeal fee); or (3) a timely filed Request for Continued Examination (RCE) in compliance with 37 CFR 1.114.

**PERIOD FOR REPLY [check either a) or b)]**

- a)  The period for reply expires 3 months from the mailing date of the final rejection.
- b)  The period for reply expires on: (1) the mailing date of this Advisory Action, or (2) the date set forth in the final rejection, whichever is later. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of the final rejection.  
ONLY CHECK THIS BOX WHEN THE FIRST REPLY WAS FILED WITHIN TWO MONTHS OF THE FINAL REJECTION. See MPEP 706.07(f).

Extensions of time may be obtained under 37 CFR 1.136(a). The date on which the petition under 37 CFR 1.136(a) and the appropriate extension fee have been filed is the date for purposes of determining the period of extension and the corresponding amount of the fee. The appropriate extension fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action; or (2) as set forth in (b) above, if checked. Any reply received by the Office later than three months after the mailing date of the final rejection, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1.  A Notice of Appeal was filed on \_\_\_\_\_. Appellant's Brief must be filed within the period set forth in 37 CFR 1.192(a), or any extension thereof (37 CFR 1.191(d)), to avoid dismissal of the appeal.
2.  The proposed amendment(s) will not be entered because:
  - (a)  they raise new issues that would require further consideration and/or search (see NOTE below);
  - (b)  they raise the issue of new matter (see Note below);
  - (c)  they are not deemed to place the application in better form for appeal by materially reducing or simplifying the issues for appeal; and/or
  - (d)  they present additional claims without canceling a corresponding number of finally rejected claims.

NOTE: See Continuation Sheet.

3.  Applicant's reply has overcome the following rejection(s): \_\_\_\_\_.
4.  Newly proposed or amended claim(s) \_\_\_\_\_ would be allowable if submitted in a separate, timely filed amendment canceling the non-allowable claim(s).
5.  The a) affidavit, b) exhibit, or c) request for reconsideration has been considered but does NOT place the application in condition for allowance because: \_\_\_\_\_.
6.  The affidavit or exhibit will NOT be considered because it is not directed SOLELY to issues which were newly raised by the Examiner in the final rejection.
7.  For purposes of Appeal, the proposed amendment(s) a) will not be entered or b) will be entered and an explanation of how the new or amended claims would be rejected is provided below or appended.

The status of the claim(s) is (or will be) as follows:

Claim(s) allowed: \_\_\_\_\_.

Claim(s) objected to: \_\_\_\_\_.

Claim(s) rejected: \_\_\_\_\_.

Claim(s) withdrawn from consideration: \_\_\_\_\_.

8.  The proposed drawing correction filed on 19 May 2003 is a) approved or b) disapproved by the Examiner.
9.  Note the attached Information Disclosure Statement(s)( PTO-1449) Paper No(s). \_\_\_\_\_.
10.  Other: Notice of References Cited (PTO-892)

Continuation of 2. NOTE: The arguments presented by Applicant require further consideration. Applicant asserts several elements are lacking from the prior art teaching relied upon for rejecting the claims including: a phase modulator control signal; coupling out part of the entire WDM signal; and cross phase modulation reduced for all single signals simultaneously. Coupling out part of the entire WDM signal and cross phase modulation reduced for all single signals simultaneously are not positively claimed. A phase modulator control signal is definitely shown in figure 4 (traveling from phase modulator driving circuit to the phase modulator.) The Examiner has attached Kaminow et al. (Kaminow) to further support the assertion that inherent in the system of Kaede et al. dispersion walk-off reduces cross phase modulation. Kaminow teaches that cross phase modulation is negligible when a pulse walks completely by a disturbing pulse, see page 208, first paragraph (partial), page 208, 209 and formula 8.11 and the discussion thereof.
